

Hurricane Protection

Protect your home during the hurricane season with stylish hurricane protection. Hurricane shutters combine security, weather protection, energy conservation and noise control into a single product.

Storm Protection

Hurricane shutters are built to protect your home from hurricane force winds and airborne debris. Get your shutters installed now, before the next storm.

Security

When the shutters are in locking position they provide a barrier between your home and burglars, making it nearly impossible for them to enter your home. This is a great option for a second residence that you only visit a few times a year.

Energy Savings

Hurricane shutters can help you maintain the temperature in your home and reduce your heating or air conditioning costs. The shutters can also be used to provide sun protection to your home.

Multiple Options

With multiple color choices you can pick a color that will match the style of your home or business. Hurricane shutters have multiple styles of locking devices to choose from to meet your wants and needs for protection and security. A bi-annual maintenance program is available on some shutters.

Hurricane Protection

There are 5 styles of Hurricane Protection to Choose From:

ROLL DOWN SHUTTERS

Roll down shutters provide security and storm protection for your home or business. The roll down shutter system comes with a manual crank or can be upgraded to an electric motor operation. The elegant design has minimal visual impact with ultimate protection and increases privacy and noise reduction.

ACCORDION SHUTTERS

Accordion shutters glide smoothly making them easy to operate. When the shutters are closed they protect your home from storm conditions and keep your home warmer in the winter and cooler in the summer. The accordion shutters lock into place with a key. When opened they fold easily into storage. The accordion shutters can be custom designed to any length and width to meet your requirements.

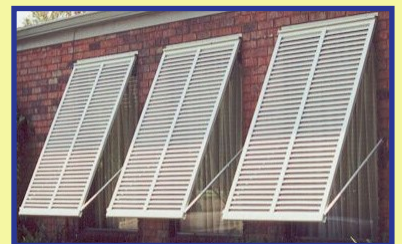

HURRICANE STORM PANELS

The storm panel shutters come in aluminum or clear poly carbonate. They are removable panels that can be installed vertically or horizontally. The panels are designed to slide into a track that is installed onto your windows or they can be attached directly to the wall with removable anchors and screws.

BAHAMA SHUTTERS

Bahama Shutters offer an aesthetically pleasing hurricane protection to your home or business. They are easy to operate and are adjustable up to 60 degrees. Bahama shutters provide great storm protection and security along with light control, ventilation and privacy for daily use.

COLONIAL SHUTTERS

Colonial shutters offer storm protection while enhancing the look of your home. They are easy to operate and provide great storm protection and security. Colonial shutters are available in arches, angles and custom sizes.
